

Green Bay, WI ~ Utility

This all aluminum custom designed utility body was built on a Ford F450 Super Duty chassis. The body has a full transverse compartment at the front portion of the body. In the transverse compartment there is two (2) heavy-duty dual direction slide out trays. The remaining side compartments consist of (2) rollout trays with dividers in each compartment. In each side compartment ahead of and behind the rear wheels there is a toolbox permanently installed at the bottom of the compartment. At the rear/center portion of the body there are four (4) slide in compartments for ladders and long handled tools. At the center portion of the body there is a 100% extension heavy-duty 1000# capacity rollout tray, which is coated with spray on truck bed liner material. At the top center portion the roof of this compartment retracts into the forward part of the body. Each compartment is equipped with a swinging lap-over style door with a locking handle. The truck is equipped with eight (8) sealed amber LED oval warning lights; two (2) in the grille, one (1) at each front fender, one (1) at each rear wheel well and two (2) at the rear. The taillights are also sealed oval LED lights. At the top of the truck there is a Code 3 LED Narrow-stick style traffic directing light. There is also a heavy-duty trailer/pintle hitch and safety chain loops installed at the rear of this truck.
