

## Black Creek, WI Pumper

This pumper is built on a Freightliner M2-106 cab and chassis with a 330hp Cummins diesel engine. The pump is a Waterous CS 1250GPM pump with a top control pump module with the two (2) speedlays built into the transverse walkway. The front bumper extension houses a 1 3/4" trashline discharge with hose well and front suction inlet. The pump is equipped with a FoamPro 2002 foam injection system and also a FoamPro PowerFill system. The water tank is a UPF 1500 gallon tank with a 30-gallon foam cell. The body is an all aluminum structure with Gortite roll up doors. The hard suction hose and ladders are stored in a slide in compartments at the left and right rear with a folding tank compartment at the upper center rear through the water tank. The hose bed is equipped with an aluminum diamond plate cover, hinged at the sides with vinyl flaps at the rear. The warning light package is an all Whelen LED system. The on board generator is an Onan hydraulic unit powering multiple outlets and a Will Burt light tower mounted at the top and front of the apparatus body.
