

## Canosia Vol Fire Dept, Duluth, MN ~ Tanker

This tanker is built on a Kenworth T-300 cab and chassis with a 360hp diesel engine. The truck is equipped with a Hale AP-500 PTO pump with pump control panel in the left side front compartment. The pump is plumbed with two (2) 2 ½” discharges and one (1) 1 ½” preconnect discharge at the left side catwalk. The water tank is a UPF “Wetside” 2000 gallon tank equipped with three (3) Newton Kwik-Dump manual dump valves and telescoping chutes. The lower body is an all aluminum structure with Gortite aluminum roll up doors. The warning light package is an all Whelen Super LED package.
