

Crystal Twp, MI Tanker

This tanker is built on a Kenworth T-300 cab and chassis with a Paccar 360HP diesel engine. The apparatus is equipped with a Darley HM500 PTO pump midship mounted with a side control module with crosslays at the top. The apparatus body is an all aluminum structure with Gortite aluminum roll up doors. The driver side is equipped with a manual folding tank compartment and the passenger side is equipped with ladder brackets and hard suction hose storage. The water tank is a 2000-gallon UPF tank equipped with three (3) Newton manual dump valves with telescoping chutes. The side dumps are controlled at the rear panel with extension rods built onto the Newton dump valves. The apparatus is equipped with an all Whelen LED warning light package.
