

Fountain Fire Dept, Fountain MN ~ Mini-Rescue

This all aluminum Mini-Rescue style body was built on a Ford F550 chassis w/Powerstroke diesel and automatic transmission. The right front compartment is open to the rear center compartment that is full depth, front wall to rear doors. There is a permanent shelf with a divider throughout the whole right front rear compartment approximately 10" from the top. At the bottom of the right front compartment there is a heavy duty slide out tray that is set up for (2) complete air packs to be mounted and storage for (12) spare bottles. The rear compartment also has a heavy duty slide out tray that is approximately 60" deep. The left front compartment is where the on board Gillette gas powered generator and breaker box is located. The other compartments have adjustable shelves for storage of equipment. All the compartment floors and shelves have Turtle Tile floor matting installed. The warning light package is consisted of Code 3 lights with strobe intersection lights and light bar and (2) Power Arc 210° flashers mounted at the upper rear of the body. The taillights are also Code 3. There are (2) Extend-a-Lite 500 watt permanent mount telescoping lights at the front of the body and (2) Extend-a-Lite tripod lights at the rear. At the front of the chassis there is a chrome brush guard and a Warn 12,000# winch installed. The lettering is vinyl Sing-Gold and 1-4-1 reflective stripe with "Z" pattern.
