

Granger Fire Dept, Granger Iowa Custom Pumper

This pumper is built on a Spartan Metro Star MFD flat roof cab and chassis powered by a Cummins ISC 330hp diesel engine with Allison automatic transmission. The pump is a Waterous CS 1250 GPM pump equipped with a top mount operator's control panel. The water tank is a 1000-gallon United Plastics Fabricating poly tank. The all aluminum rescue style body is equipped with Gortite aluminum rollup doors. Each of the compartments is equipped with multiple shelves, slide out trays, and tool boards. At the rear of the unit there are slide in ladder and folding tank compartments with slide in hard suction hose storage through the tank accessible from the rear step compartment. The hose bed is equipped with an aluminum diamond plate hinged hose bed cover with vinyl end flaps at the rear. The warning lights are an all Whelen Super LED system. The apparatus generator is a Gillette 6000-watt diesel unit plumbed to the chassis fuel and electrical system for operation with remote start/stop panel at the pump operator's panel. There are two (2) Akron 1500-watt/240-volt telescoping scene lights, one (1) each side of the unit. There is also Whelen 12-volt Super LED 900 Series scene lights installed on the apparatus body.
