

## Howards Grove, WI ~ Equipment Truck “B”

This equipment truck for the Howards Grove, WI Fire Department is built on a Freightliner MT-55 chassis with Utilimaster body. The body was then modified with exterior compartments which are equipped with multiple adjustable shelves, roll out trays and tool boards. The interior of the body is equipped with a command desk at the left front corner with file cabinets under the desk. There is seating for four (4) people at the right side in SCBA seats with seat belts. The passenger side interior has a bathroom at the left rear corner equipped with an Incinolet incinerating toilet that is powered off of a shoreline inlet or the generator. There is also a sink with hot water capabilities, a microwave and large refrigerator in a kitchenette set up at the passenger side between the bathroom and command desk. The remaining interior is equipped with storage cabinets and compartments including two (2) spare gear lockers. The truck is equipped with a 15kw Onan PTO generator which supplied power to numerous outlets throughout the body, a Command Light CL615-4HM light tower and a Hannay cable reel with cable and junction box. At the top of the body there are two (2) roof mounted air conditioner/heating units and additionally there is a manually operated awning at the right side of the apparatus. The emergency warning light system is an all Whelen Super LED warning light package with 12-volt scene lighting at the sides and rear. Two (2) Havis-Shields 12-volt recessed area lights are also installed at the right side under the awning. Realwheels stainless steel wheel covers complete the apparatus.
