

Ishpeming, MI ~ Mini Rescue Pumper

Built on a Ford F-550, 4-Door, 4X4 chassis with a 7.3-liter Power Stroke diesel. This truck has an all aluminum body with full depth compartments, three each side. The rear of the truck has a long compartment which houses the 300 gallon water and 5 gallon foam tanks, a Waterous high pressure portable pump, Scotty foam proportioning system, pump panel with all controls and gauges, and (2) storage shelves. The compartment has a Gortite roll-up door at the rear and a louvered aluminum diamondplate access door on top that is also equipped with gas shocks to hold it open or closed. Under the tank and pump compartment there is storage for (2) sections of 4-1/2" suction hose, (2) sections of 2-1/2" suction hose, (2) pike poles, and an 8' wall ladder at the left side. The right side has a 1000#, 100% slide out tray for equipment storage; both these compartments have aluminum diamond plate doors with "D" ring latches. On top of the body there is (3) crosslay hose storage beds one is a live 1-1/2" cross lay discharge and the other (2) are dead lays or hose storage. The truck is equipped with a Ramsey 8000lbs winch that is recessed in the front bumper, and there is a chrome wraparound brush guard in front. The lighting consists of a Federal Vector light bar, Federal Signal Master (rear upper), Code 3 strobes, Fire Research telescoping scene lights,(2) Weldon scene lights at the rear, and Weldon stop/tail directional, and backup lights. The truck is also equipped with a Federal siren and speaker.
