

Town of Lawrence WI Fire Department ~ Brush Unit

This brush unit is built on a Ford F350 chassis with a 5.4liter gasoline engine with an automatic transmission. The body is an all aluminum flat rack style body with two (2) compartments at the right side; one (1) under the body at the right front and one (1) at the top of the body at the right side. At the left front of the body there is a riding area for a firefighter during wildland fire “pump and roll” operations. The water tank on the body is a UPF 200 C skid tank with foam cell conversion kit (12-gallon). The pump is a Darley 13hp 1-1/2AGE gasoline powered unit equipped with a Scotty around the pump foam proportioner. At the top of the water tank there is one (1) aluminum Hannay electric rewind booster hose reel equipped with 100’ of rubber booster hose. The apparatus is equipped with all Whelen LED lighting, Traffic Advisor, siren and speaker.
