

## **LENA, WI ~ RESCUE/EQUIPMENT VAN**

This Rescue/Equipment van for the Lena, WI Fire Department is built on an International chassis. The aluminum body was converted to a rescue style body with all aluminum compartments at the exterior equipped with Gortite rollup doors. The body interior has seating for (6) fire fighters in SCBA seats complete with seat belts. The remaining interior is equipped with storage cabinets except the right front where there is a command desk and a refrigerator provision. The apparatus is equipped with all Code 3 LED warning lights and Weldon 12-volt halogen scene lights. There is a Honda gasoline powered 6500-watt generator installed in the apparatus body to Power All 120/240 volt components. The generator powers (2) Akron 1500-watt telescoping tripod lights, (2) Hannay cable reels with Akron junction boxes and numerous exterior and interior outlets. The interior of the apparatus is also equipped with numerous 12-volt power point outlets. Gold colored lug nut covers finish the apparatus for the Lena Fire Department.
