

Northome Fire Dept, Northome Minnesota  
Commercial Pumper

This pumper is built on a International 4 door chassis powered by a Maxxforce 10 330hp diesel engine with Allison automatic transmission. The pump is a Waterous CS 1250 GPM pump with a LH side control operator's control panel featuring Noshok gauges, (3) 6" and (1) 2-1/2" suction inlets with (5) 2-1/2" and (2) 1-1/2" discharges. The water tank is a 1250-gallon United Plastics Fabricating poly tank. The all aluminum high / low side rescue body is equipped with Gortite aluminum rollup doors. The body features 6" and 5" suction hose trays and a Zico LAS ladder rack on the RH side. The apparatus generator is a SmartPower 6000 Watt hydraulic unit providing 120 / 240V. There are two (2) FRC Focus 500-watt/120-volt telescoping scene lights, one (1) each side of the unit.
