

Quincy, Franklin, Hancock Twp, MI ~ Skid Unit Upgrade

This skid unit was installed onto a customer supplied Ford Super Duty pickup truck. The water tank is a UPF Defender Series 300 gallon tank w/5 gallon foam cell. The skid unit was mounted on an aluminum framework to supply storage for long handled tools underneath with rear access. The pump is a CET 18hp MR pump and is also supplied with a Foam Pro 1600 foam system. The pump supplies a booster reel at the top of the water tank, two (2) pre-connect discharges (one (1) each side with hose tray), one (1) 1-1/2" rear discharge, one (1) 2-1/2" rear discharge and one (1) 3/4" garden hose fitting at the rear. There is also one (1) 2-1/2" suction inlet provided at the rear. A Code 3 light bar was installed along with Sho-me LED flashers in the grille for visual warning and the customers siren and a Code3 speaker was installed for audible warning.
