

Richland County, Sidney, MT ~ Walk-in Rescue

This rescue apparatus is built on a Kenworth T-300 cab and chassis with 360HP diesel engine. The body is an all aluminum structure equipped with Gortite aluminum roll up doors. The exterior body compartments are equipped with multiple slide-out trays and adjustable shelves. The body interior is equipped with a command desk at the left front corner and seating for six (6) personnel in SCBA seats. There is an onboard 4-bottle cascade system with panel at the right rear interior and a fill chamber in the right side over wheel compartment. Also in the right side over wheel compartment there is a twenty (20) bottle SCBA bottle rack that is accessible from both the interior and exterior of the apparatus body. The apparatus is equipped with an Onan 15kw PTO generator which powered numerous 120/240 volt receptacles, both interior and exterior, (1) cable reel, FRC 1000watt recessed lights, FRC 1000 watt telescoping lights and FRC 1000 watt tripod lights. The warning light package is an all Whelen LED system.
