

Ringle, WI ~ Rescue

This rescue unit is converted from a customer supplied cube van. The van has been upgraded to be used as a rescue unit. The passenger seat at the chassis cab was removed and replaced with a SCBA seat. At the front of the body there was a crew seating area installed with doors at each side of the apparatus body. Within the crew area there is three (3) SCBA seat backs installed with a full width bench seat, which flips up to allow additional storage of equipment and to house the crew area heater to be mounted. The crew area is completely sealed off from the remaining rear portion of the body. At the rear portion of the body Gortite aluminum roll up doors were installed for installation of storage cabinets. The apparatus was outfitted with all Whelen LED warning lights to finish the conversion to a rescue apparatus.
