

South Hamblen Co Vol Fire Dept, TN Mini Rescue-Pumper

This mini rescue pumper/brush unit was built on a Ford F550 4-door chassis. It has an all aluminum body with three (3) compartments on each side for equipment storage. The center and rear of the body is open to accommodate at customer supplied "skid unit." In the right front compartment there is a Honda 3800 watt gasoline powered generator on a slide out tray wired to an on board breaker box. The generator breaker box is wired to two (2) 500 watt Extenda-Lites mounted on the front of the body and two (2) 500 watt Extenda-Lites mounted on the front of the body and two (2) outlets, one (1) at each rear wheel well of the body. At the front of the chassis there is a chrome brush guard and a winch which was customer installed. The warning light and siren package is Code 3.
