

Thornton, CO ~ Mini Pumper

This Mini Pumper is built on a Ford F550 Super Duty cab and chassis with Powerstroke diesel. The pump is a Waterous CP-2 250GPM PTO pump supplying one (1) booster reel discharge, two (2) 1- $\frac{1}{2}$ " discharges at the side panels, one (1) 2- $\frac{1}{2}$ " at driver side panel and one (1) Akron Fire Fox front bumper monitor. The UPF water tank has a capacity of 400 gallons of water. The body is an all aluminum structure with flush mount hinged box pan doors. There are additional storage compartments at the top of the body each side with lift up doors for suction hoses and long handled tools. The warning light package is an all Whelen Super LED package with a Code 3 Narrowstick traffic directional light at the rear and two (2) Federal Visibeam II remote controlled spotlights one (1) each side at the top of the pump module. There are also two (2) FRC Focus 12-volt telescoping scene lights mounted at the rear of the body, one (1) each side.
