

City of Wausau, Wausau, WI ~ Pumper

This pumper for the City of Wausau, WI is built on a Freightliner M2-106 4-door cab and chassis with a Cummins diesel engine. The pump is a Hale QMax 1500 GPM pump with a top mount pump module with speedlays under the transverse walkway. The water tank is a Pro Poly tank with a 1000 gallon capacity. The body is an all aluminum structure with Gortite aluminum roll up doors and dual high side compartments. The ladders are stored on an outside arm ladder rack at the right side of the body. The warning light package is an all Federal LED warning light package with Whelen 900 Series LED 12-volt scene lights. The apparatus is also equipped with a Harrison MAS 6kw hydraulic generator and two (2) FRC Focus 1500-watt/240-volt telescoping scene lights.
